A Drop Of Blood Third

Neurogenic orthostatic hypotension (NOH): When a change in body position, such as rising from a chair or bed, causes a dramatic drop in blood pressure. NOH is caused by an underlying neurologic disorder that affects the autonomic nervous system. It is common with neurodegenerative disorders like Parkinson's disease and Lewy body dementia as well as diabetic nerve damage.

What a Sudden Drop in Blood Pressure Means

A Drop of Blood (Let's-Read-and-Find-Out Science 2) Really nice book with lots of info about what blood is and what it does for our bodies. It's amusing to me that this has dracula even if my 5 year old doesn't know who that is.
