Earth In Space Pearson Success

From Earth, you see only the part of the moon that is lighted by the sun. As the moon moves around Earth, different amounts of its lighted side face Earth. When the lighted half of the moon faces Earth, it looks like a circle of light. You cannot see the moon when the lighted half faces away from Earth. During a new moon, you cannot see the moon

Earth and Space

Due to the vast distances in the solar system, astronomical units (AU) are used for measurement instead of kilometres (km). Recall what 1 AU is equivalent to.

Last month's test prints in space were large by Earth bioprinting standards. Each measured 30 mm long by 20 mm wide by 12.6 mm high. The BFF printed inside a Techshot-developed cell culturing cassette that strengthens the assemblage of cells over time; to the point where they should become a viable, self-supporting tissue-like structure expected to remain solid once back in Earth's gravity.
