Steering Head Lock installation - The Panhead & Flathead Site

Put the key in the switch and turn it to the left while pushing up on the little pin underneath. Once you get the switch out, look down in the hole and make sure you have all the little gears lined up correctly. They have hour glass shapes and all need to be turned correctly so the switch fits down in there properly.

Pete, try to put your key in again and turn it to on position, then take a hooked screwdriver and pull the tab and turn the lock to acc. then push the tab to the release mode and swivel the ignition towards lock while lifting up on it.

Ignition Lock problem | Harley Davidson Forums

Steering head bearings and/or front end wobble are both things to take seriously. It's commendable to do your own work, but I'd let a pro do this job under the warranty. In 1981, out of nowhere and no prior symptoms, I got a violent front end wobble that dumped be coming out of a long swooping curve. 3 weeks in the hospital and 4 months off work.

Front End Wobble - Steering Bearing? | Harley Davidson Forums

The fork lock on a Harley Davidson will not disengage. The ignition switch will unlock and move to run but the fork stays locked.

Fork lock removal on a Harley Davidson. - JustAnswer

A drill jig makes it easy but isn't necessary. Drill the hole in the boss without the lock in place then insert the lock in the correct position and drill a shallow hole in the outer cylinder. Be careful not to go too deep or you will damage the lock. If you already have the plunger and spring in place you don't need to take the lock back out.

Neck lock - The Panhead & Flathead Site

Yes it's a 1,1/2 inch nut. Loosen the stem nut, loosen the lower triple fork pinch bolts, adjust the star nut for the correct fall away, discard the lock washer, replace with the hardened washer, use antiseize on the stem and tighten the stem nut to 80ft/lbs. torque up the lower triple pinch bolts, job done.
