Motor scooters are in many cases, classified as a separate vehicle to motorbikes, given their large amount of differences, and different evolution. Scooter engine sizes range smaller than motorcycles, 50-850 cc (3.1-51.9 cu in), and have all-enclosing bodywork that makes them cleaner and quieter than motorcycles, as well as having more ...

Electric bikes, usually grouped as a type of power-assisted cycles, are equipped with an electrically powered system. The motor system is usually less than 500 watts with a rechargeable battery. When the electric motor is idle, the bike must allow the rider to pedal like a regular bike with pedals and 2 or 3 wheels touching the ground.

A person under 18 years of age who has been issued a driver's license may not: operate a motor vehicle while using a mobile telephone; operate a motor vehicle between the hours of 12 a.m. and 5 a.m.; carry passengers other than immediate family members unless accompanied by a licensed operator who has held a valid license for 2 years, is at ...

Bureau of Motor Vehicles

For a motorcycle to be street-legal, it must have several things. Among them are a license plate holder, turn signals, brake lights, and a tail-light. But, most of all...it needs a speedometer. This is so the police can write you a ticket when you're having too much fun, and then you can't claim you had no way of knowing how fast you were going.
