Pancreatic Cancer: Current Concepts in Treatment ...

Current pancreatic cancer models are similar to that of colon cancer, in which there is a progression from precancerous lesions to invasive carcinomas. Pancreatic cancer evolves from normal ductal epithelium, to pancreatic intraepithelial neoplasms/ductal lesions, to invasive adenocarcinomas [27;28]. The ductal epithelium undergoes changes that are characterized by PanIN-1A.

invade other parts of the body. There are a number of types of pancreatic cancer.

Pancreatic cancer - Wikipedia

Pancreatic cancer is currently the fourth leading cause of cancer-associated mortality and is projected to be the second leading cause within the next decade in Western countries.

Therapeutic developments in pancreatic cancer: current and ...

Pancreatic cancer begins in the tissues of your pancreas — an organ in your abdomen that lies behind the lower part of your stomach. Your pancreas releases enzymes that aid digestion and produces hormones that help manage your blood sugar. Several types of growths can occur in the pancreas, including cancerous and noncancerous tumors.
