Psychophilia, by Michelle Muckley is structured around a woman recovering from memory loss and psychosis. She is pregnant, and very excited to be so, but her husband has recently seemed to lose interest in her. She is afraid that he is having an affair with their, altogether too perfect, Japanese maid, Ishiko.

I wasn't quite sure what was true and what was in her mind throughout the whole book. Psychophilia is very psychologically-minded with complex characters and a suspenseful mystery that will grab you until the last page. I loved the book so much I'm now reading Ms. Muckley's "The Dawn" series even though I don't usually read dystopian books.

My attraction to Psychophilia wasn't the story so much (though it is not lacking). It was due to Muckley's voice and her ability to so completely and believably "get into" Charlotte's troubled mind. I found myself highlighting line after line, just so I could find a passage later and thereby revisit a clever turn of phrase.

Psychophilia by Michelle Muckley. Back in July 2014, Michelle Muckley wrote a guest post on my blog on Being Adaptable as a writer, and I finally got the chance to read her book, Psychophilia. It is the story of Charlotte Astor, a 32-year-old real estate agent, who has just tried to commit suicide.

It would seem that I edited Psychophilia until I was drained of all writing ability, which left nothing much for the WIP once Psychophilia went off to the editor. The last couple of weeks have been tough on the writing front. I have turned up each day and put in the hours, but nothing seemed to grow into quite what I wanted it to become.
