The Neanderthal Legacy: An Archaeological Perspective of ...

The Neanderthals populated western Europe from nearly 250,000 to 30,000 years ago when they disappeared from the archaeological record. In turn, populations of anatomically modern humans, *Homo sapiens*, came to dominate the area. Seeking to understand the nature of this replacement, which has become a hotly debated issue, Paul Mellars brings together an unprecedented amount of information on ...

Neanderthal legacy - an archaeological perspective from

...

Archaeological sites from Spain to Russia have been discovered that contain transitional stone tools associated with either Homo sapiens or Neanderthals. From the archaeological evidence alone, it is difficult to determine the level of interactions that were held at these sites. These sites may have been used at the same time.
